Aangan Studio · Phone enquiry component map

MESA Case 03 · every call answered, qualified against Nikhil's rubric, booked during the call — and never a price quoted

AANGAN STUDIO
INTERIOR DESIGN · PUNE

Actor / Platform	Trigger	Input	Context	Processing	AI	Output
Customer / Caller Prospective client	**Calls the studio** any hour, any day	**Name, space, locality, scope, timeline** decision-maker; may ask the price				**Spoken enquiry**
Vaani AI Live voice agent	**Call connects** SIP participant joins the room	**Live audio**	**Agent prompt** seven questions + Nikhil's five checks	**Answers, qualifies, offers two slots**	**Vaani voice agent** deflects every pricing question	**Transcript, summary, entities, recording**
Webhook Next.js on Vercel	**call_started, then call_postprocessing**	**Unsigned POST** secret travels in the URL as ?token=	**room_name is the call id** event inferred from payload shape	**Authenticate, normalise, check idempotency**		**Call row opened** before anything can fail
Classifier Gemini Flash	**Transcript available**	**Full transcript**	**qualified.md + services.md** verbatim · pricing.md never loaded	**Classify against the five criteria**	**Gemini Flash** JSON mode · temperature 0	**qualified / not_fit / complaint / unclear** + deciding criterion + 8-line note
The Cut Price filter (code)	**Any model output**	**fit_reason, criterion, handoff note**	**A budget the caller volunteered is allowed** it is their statement, not ours	**Strip every studio-voiced figure** a not_fit citing price is overruled		**Text carrying no price** + redaction audit on the row
Handoff Resend + HubSpot	**Verdict is qualified**	**Lead fields, note, HMAC-signed links**	**Designer chosen by specialty (home / office)**	**Email the designer, create a HubSpot deal** independent — one failing never blocks the other		**Designer gets the brief** Claim · Reschedule · booking link **complaint → front desk, a human calls back**
Supabase Database + metrics	**Every event**	**Call log, verdict, costs, transcript**	**RLS on, service role only** the browser never reads it	**Upsert the row** a database failure never loses the lead		**Persistent call record**
Nikhil / Founder Dashboard	**Opens the dashboard**	**daily_metrics view**		**Aggregate the month**		**Calls, after-hours share, qualified, booked, show-ups, running cost** and how many prices were blocked

Deployment and evidence

GitHub — private repo · 45 tests → **Vercel** — Next.js 16, production → **Supabase** — Mumbai · RLS on → **Live dashboard** — basic auth → **Eval: 20 / 20** — real September enquiries

AI component · System step · Output · Human step / handoff · The Cut · escalation · Main flow · Data flow

Scope: incoming phone calls. WhatsApp and the web form reuse every component except the trigger.
